FOR IMMEDIATE RELEASE

SCHUST NAMES NEW PRESIDENT

Auburn, Indiana, July 17, 2019 – Schust, a provider of turnkey industrial ventilation systems that clean the air in which employees work has announced that John Rothermel has been named President effective June 10, 2019. Rothermel succeeds, John Luttmann, who retired in December 2018 after nearly 30 years at Schust.

Rothermel has over 20 years of sales and operations leadership in industrial markets and has helped in scaling engineering, fabrication, and installation businesses that serve a global client base. “John has a track record that aligns well with supporting Schust in reaching their goals,” says Joseph Whelan, President, Scheuch USA, Inc. “His global experience will be a valuable asset as he continues to find opportunities for synergies that drive additional growth and revenue sources.” Scheuch USA, Inc. is the parent company of Schust.

Rothermel will be responsible for leading and motivating the Schust teams to achieve top and bottom line growth goals. “We have a great team with proven skills in delivering significant value to the clients we serve,” says Rothermel. “In turn, Schust clients will continue to benefit from our expertise in turnkey solutions for core markets currently being served. Additionally, significant opportunity exists to leverage Schust project execution and Scheuch global technical expertise to penetrate and grow new markets and capabilities. I look forward to leading this effort and in working with the team to exceed our business and professional goals.”

Rothermel has a degree in engineering and an MBA from Villanova University and he has earned a Professional Engineer (P.E.) designation.

###

About Schust

Schust provides turnkey industrial ventilation systems that clean the air in which employees work in. We understand the challenges industrial environments face today and have a flexible approach to project management. At Schust, we promise to design, fabricate, and install innovative air pollution control solutions that are guaranteed to perform. Schust becoming a member of the Scheuch Group is just one way to honor that promise. North American customers have local access to highly-respected European air pollution control and bulk material handling system technology. Keeping the air clean is no small task. It takes dedication and commitment to customer satisfaction. For nearly a century, customers have continued to trust Schust technology and in-house manufacturing experts to take on APC projects that they could only imagine.
